‘ARIF BIN ISAHAK

AI/ML, Data Science, Full-Stack Web Development, Mobile App Development (Intern)

011-57757657 | arif05.isahak@gmail.com | LinkedIn/'Arif Isahak | GitHub Profile

PROFESSIONAL SUMMARY

Academically driven Computer Science student majoring in Intelligent Computing (CGPA: 3.52) with practical experience in AI/ML, Android app development, and full-stack engineering. Recently completed an Android Developer short internship at SmartLab Sdn. Bhd., developing an AI-driven data assistant for aviation security at Penang International Airport. An award-winning innovator (IIEC Gold Medalist) and strategic leader serving on the National Executive Committee for HARMONI Malaysia. Proven ability to combine robust programming skills (Python, Kotlin, TensorFlow) with strong problem-solving to deliver scalable, high-impact technology solutions.

EDUCATION

Bachelor of Computer Science, Intelligent Computing *2024 - 2028*

Universiti Sains Malaysia (USM)

- **Current CGPA:** 3.52 (until Year 2 Sem 2)
- **Academic Awards:** 2x Dean’s List Achiever

Foundation in Engineering and Technology (Pre-USM) *2023 - 2024*

MARA’s Young Talent Development Program (YTP), Kolej MARA Kuala Nerang

- **CGPA:** 3.96
- **MUET:** Band 4.0

Sijil Pelajaran Malaysia (SPM) *2022 - 2023*

Sekolah Menengah Islam Al-IKRAM

- **SPM:** 11A’s
- **Academic Awards:** Best Student (2023)

SKILLS

Programming Languages | Python, C++, Java, JavaScript, R
Web Development | NextJS, HTML, CSS, ReactJS, Vercel, NodeJS
Databases | MySQL, Oracle APEX
AI/ML & Data Science | LangChain, MLops, Hugging Face, TensorFlow, Keras, Pandas, NumPy
Android Development | Android Studio, Kotlin, Jetpack Compose
Cloud, Networking & Backend | Java Servlets, RESTful APIs, Firebase
Tools & Version Control | Git, GitHub, Anaconda
Soft Skills | Strategic Leadership, Teamworking, Project Management, Technical Documentation, Problem-Solving, Pitching Ideas

HONORS & AWARDS

1st Place Pitching Project | Muharrik Zon vs Zon Pitch Project by HARMONI Malaysia (2025)
Gold Medalist | International Innovation & Entrepreneurship Carnival (IIEC) (2024)
5th Place ECO-Challenge | Material Product and Design Eco-Challenge (MPDEC) (2024)

LEADERSHIP EXPERIENCES

National Executive Committee Member, Persatuan Belia HARMONI Malaysia
Youth Association *2026 - 2028*

- **National Operations Management:** Directed youth activism initiatives and centralized execution strategies across 8 state chapters and 25 higher education institution (IPT) branches nationwide.
- **Strategic Governance:** Co-authored the official organizational constitution and navigated complex chain-of-command structures in collaboration with experienced regional leaders.
- **Stakeholder Engagement:** Managed high-level relationships and negotiations with major stakeholders, including the Ministry of Youth and Sports (KBS), national NGOs, and public media and publication outlets.

President, Persatuan Belia HARMONI Pulau Pinang
Youth Association *2025 - 2027*

- **Executive Team Leadership:** Managed a diverse committee of student leaders from various universities and colleges across Penang, effectively handling conflict resolution and team optimization.
- **Project Direction (STEM Initiative):** Spearheaded "World of Wonders," a flagship educational project training secondary school students in emerging technologies, including drone operation, 3D modeling, 3D printing, robotics, and programming.
- **Strategic Partnerships:** Cultivated strong collaborative networks with prominent agencies and organizations, including the Penang Youth Development Corporation (PYDC), Pertubuhan IKRAM Malaysia, and various university Student Representative Councils (MPP).

WORK EXPERIENCE

SmartLab Sdn. Bhd. | Android Studio, Python, Kotlin, RESTful APIs, Firebase
Short Intern, Android Developer *February 2026 - March 2026*

- **AI Data Asisstant Development:** Developed a specialized AI asisstant for an operational insight from dataset that track cargo staff check-in and check-out times at Penang International Airport.
- **Client-Specific Integration:** Designed the system specifically to meet the operational and logging requirements of Aviation Security for Malaysia Airports Sdn Bhd.
- **Mobile App Implementation:** Utilized Android Studio to build a seamless user interface while integrating mobile devices to simplify staff monitoring and client workflows.

PROJECTS

AI Data Asisstant | Python, JavaScript, Streamlit, RESTful API
Short Intern Project

- **RESTful API Architecture:** Designed the data pipeline to securely ingest and retrieve real-time staff attendance logs using RESTful APIs and structured JSON payloads.
- **Google API Integration:** Integrated the Google API to leverage pre-trained Large Language Models (LLMs), efficiently offloading analytical processing from the backend without training custom models.
- **AI Prompt Engineering:** Engineered dynamic prompts to feed raw database logs directly into the API, mapping data distributions to instantly identify operational trends like peak staff check-in times.

Seismic Bump Prediction (ML) | Python, Scikit-Learn, TensorFlow, Pandas, NumPy
University Project

- **Predictive Modeling:** Developed a machine learning classification model to predict the occurrence of hazardous seismic bumps in coal mines using historical seismic and acoustic data.
- **Exploratory Data Analysis (EDA):** Cleaned and processed complex datasets using Pandas, applying feature scaling and handling imbalanced data distributions to ensure unbiased model training.
- **Algorithm Implementation:** Engineered and evaluated multiple classification algorithms, including Support Vector Machines (SVM) and Artificial Neural Networks, to identify the most effective predictive architecture.
- **Model Evaluation:** Conducted rigorous performance testing using hyperparameter tuning to optimize the model's Recall and F1-score, prioritizing the accurate detection of high-risk seismic events.

Clinic Queue Management Application | Android Studio, Kotlin, Jetpack Compose, Firebase
Short Intern Project

- **Mobile Architecture:** Developed a dedicated Android mobile application utilizing Android Studio to streamline patient queuing and optimize daily clinic operations.
- **Hardware Integration:** Engineered the system to interface directly with external hardware devices, enabling real-time data synchronization between the mobile app and physical queue systems.
- **Operational Efficiency:** Improved patient flow management by implementing real-time queue tracking, reducing wait-time bottlenecks and enhancing the overall patient experience.

CERTIFICATION

Natural Language Processing & Generative AI Technical Workshop | by UST, December 2024
Gold Award: International Innovation & Entrepreneurship Carnival (IIEC) 2024 | by MARA, February 2024
5th Place: Material Product and Design Eco-Challenge (MPDEC) 2024 | by USM, January 2024
